

Rec'd
from BT
9/2/99

Thanks for the invitation Deborah.

Sounds interesting and worthwhile.

I've copied Guy and Bob Hall on this, in case they have time to come.

These meetings are likely to modify (by adding greater depth) to the training workshop on the 27th.

See you there.

>>> DEBORAH GOLDBLUM 08/16/99 10:18am >>>

Since we are addressing about 10 DuPont facilities in Region III, they want to meet to discuss criteria for "acceptable level" for the indoor/outdoor air and GW/SW interaction portions of the Eis. We are scheduling a brain-storming/workshop to meet with them on each of these issues. It would be great if you or someone from your group could participate also.

The air workshop is scheduled for Monday 9/13 from 9-12.

The gw/sw workshop is scheduled for Thursday 9/23 from 1-4.

Joel and I will be driving down to D.C. on the afternoon of 9/13 for the Plain English workshop, so you'd only need a one-way train fare for the workshop on the 13th.

Let me know if you are interested.

Deb
